Switching Between Movement Patterns

Mathematical Modeling — IEAP Final Project, Group E

Gaia Gassole Chloé Gilles Jennifer Houmard

11 November 2026

Table of contents

1 Introduction **2**
1.1 Scientific context . . . 2
1.2 Problem and research question . . . 2
1.3 Objectives and scientific approach . . . 2

2 Understanding the Model **2**
2.1 State variable and parameters . . . 2
2.2 Meaning of an equilibrium . . . 2
2.3 Scope and assumptions . . . 2

3 Equilibria and Stability **2**
3.1 Graphical equilibrium analysis at $I = 0$ . . . 2
3.2 Stability from the sign of the rate of change . . . 2
3.3 Interpretation: two possible attractors . . . 2

4 Euler Simulations **2**
4.1 Explicit Euler method . . . 2
4.2 Long-term behaviour . . . 2
4.3 Numerical implementation check . . . 2

5 Effect of Parameters **2**
5.1 Equilibria with a positive instruction ($I = 0.70$) . . . 2
5.2 Simulations with the positive instruction . . . 2
5.3 Comparing both instruction conditions . . . 2

6 Discussion and Conclusion **2**
6.1 Main findings . . . 2
6.2 Link to coordination dynamics . . . 2
6.3 Limitations and interpretation . . . 2
6.4 Conclusion . . . 2

References **3**

Appendix A **4**
6.5 Additional numerical checks . . . 4
6.6 Group contributions . . . 4

1 Introduction

1.1 Scientific context

1.2 Problem and research question

1.3 Objectives and scientific approach

2 Understanding the Model

2.1 State variable and parameters

2.2 Meaning of an equilibrium

2.3 Scope and assumptions

3 Equilibria and Stability

3.1 Graphical equilibrium analysis at $I = 0$

3.2 Stability from the sign of the rate of change

3.3 Interpretation: two possible attractors

4 Euler Simulations

4.1 Explicit Euler method

4.2 Long-term behaviour

4.3 Numerical implementation check

5 Effect of Parameters

5.1 Equilibria with a positive instruction ($I = 0.70$)

5.2 Simulations with the positive instruction

5.3 Comparing both instruction conditions

6 Discussion and Conclusion

6.1 Main findings

6.2 Link to coordination dynamics

6.3 Limitations and interpretation

6.4 Conclusion

References

Appendix A

6.5 Additional numerical checks

6.6 Group contributions
